EDUCATION

Business Intelligence(computing)

Faculty of Economics and Management of Mahdia
(2020/2021)

Software Engineering & Full-Stack Web Development

Holberton School, Tunisia (2022/2023)

GRAE: C#18

Holberton school is a peer-learning, project-guided, full stack software engineering school in San Francisco.

Simple Shell (C) ([Github](#))

- Worked with a partner to build a custom Unix bash shell that can do PATH handling and process command line commands.

Printf(C) ([Github](#))

- Worked with a partner to build a replica of the basic functionality of the standard library printf function.

AirBnB Clone(Python,Flask,HTML, CSS, jQuery, MySQL) ([Github](#))

-Used Flask and cmd libraries to write a custom RESTful API for database returns and a back-end console for viewing object data and creating instances.

PetVille (HTML, CSS, Bootstrap, JavaScript, Python, Django)

-it is a website for pet sitter to organise his informations and it is a professional way to communicate between pet sitters and pet owners.

Rento_Me (React, nodejs, Express, Mangodb, CSS, Bootstrap,) ([Github](#))

-This is a full stack web app build with MERN stack and Rest API in the server side and with React on the client side. We are saving our data to mongodb database.
